WORK EXPERIENCE

Qavi Technologies – Karachi, Pakistan

City: Karachi | Country: Pakistan

DevOps Engineer

[01/2025 – Current]

I design and manage scalable cloud infrastructure across AWS, Azure, and GCP, leveraging Terraform for IaC and Jenkins/GitHub Actions for CI/CD automation. I optimize containerized deployments using Docker and Kubernetes, implement centralized logging with ELK, and streamline cloud operations on platforms like DigitalOcean. My role focuses on enhancing system reliability, accelerating delivery pipelines, and driving DevOps best practices to support high-performing, secure, and cost-efficient environments.

Autotelematics Pvt Ltd – Karachi, Pakistan

City: Karachi | Country: Pakistan

DevOps Engineer - Part Time

[01/2025 – 07/2025]

A DevOps Engineer is a real Projects gaining experience in DevOps, focusing on automation(Ansible), version control(Github), CI/CD(Jenkins, Github Actions), monitoring(Zabbix, Nagios), collaboration, scripting(Bash, Python), and security(Firewall, SELinux).

System Administrator

[09/2023 – 12/2024]

Linux server management involves the setup, security, monitoring, and maintenance of Linux-based servers to ensure they run smoothly and securely. It includes tasks like installing and configuring software, optimizing performance, ensuring data backup and recovery, and troubleshooting issues.

Al Nafi – Remote

City: Remote

DevOps Internship

[05/2024 – 06/2024]

A **DevOps intern** is an entry-level team member who supports automation, CI/CD pipelines, version control, and cloud infrastructure. They work with tools like Git, Jenkins, Docker, and AWS, assist in scripting and monitoring, and gain practical experience in streamlining software delivery and improving system reliability through collaboration and learning.

 **Naveena Denim Mills** – Karachi, Pakistan

City: Karachi | Country: Pakistan

Computer Operator

[11/2020 – 02/2023]

Data entry involves accurately inputting data from various sources into a computer or database. It requires attention to detail, accuracy, and often involves tasks like data verification and organization.
